

ONLINE · SELF-PACED · FOR TEACHERS AND SCHOOL LEADERS

High Impact Reading Instruction and Intervention Masterclass

Supporting educators to ensure literacy success for every student

A science of reading course for teachers

A practical, research-informed course on reading instruction and intervention in the primary years. It includes course materials, recommended readings, student assessments and a course community for questions, plus bonus lectures on high-impact writing instruction with Self-Regulated Strategy Development (SRSD).

On Julie's SRSD work, Dr Karen R. Harris, co-creator of SRSD and ASU Regents Professor Emeritus:

"Your deep knowledge of SRSD is so clear, as is your own stamp on it and presentation for teachers. This is very impressive."

QUESTIONS TEACHERS ASK

- How do I teach such a wide range of levels in my classroom?
- At what point do students need intervention, and what should it look like?
- What writing strategies make a difference for struggling writers?
- Why isn't our program having the expected impact?
- How do I pinpoint the sub-skill a student is struggling with?
- How does this research translate into my daily teaching?

THIS COURSE HELPS YOU TO

- Translate the Science of Reading into practical, high-impact classroom instruction.
- Prevent and reduce the number of students at risk in literacy.
- Use Response to Intervention as both a preventative and a responsive framework.
- Teach to mastery with explicit instruction, daily review and checking for understanding.
- Pinpoint the sub-skills behind reading and spelling difficulties, and know what to do next.
- Strengthen writing at sentence and text level with SRSD.

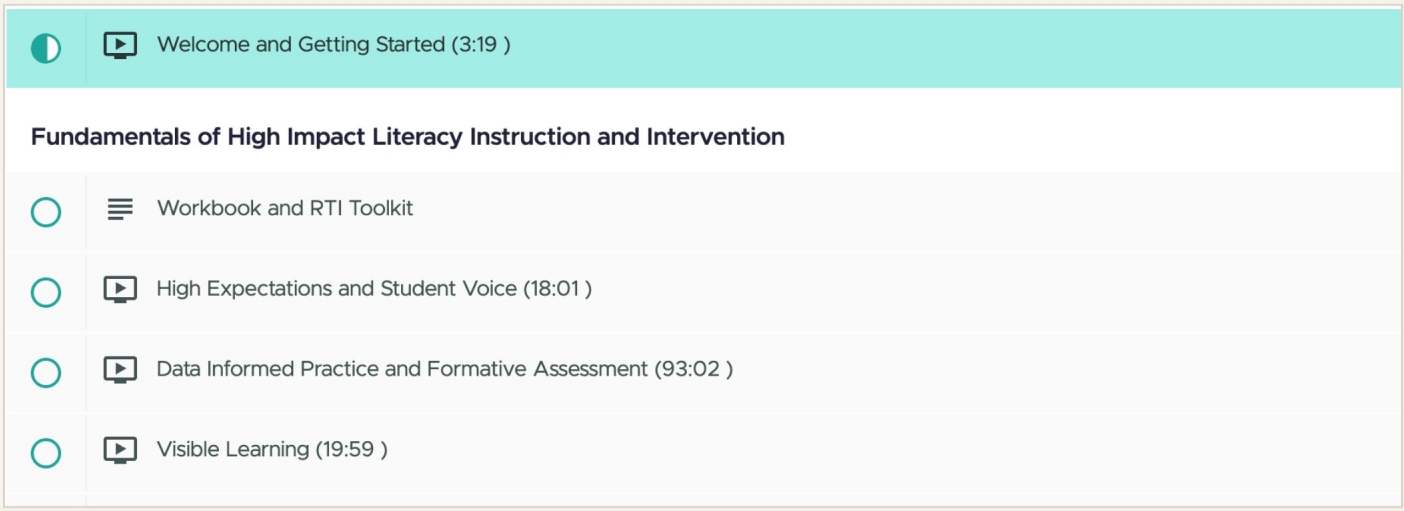

WHO IT'S FOR

Primary teachers, education assistants, literacy leaders, learning support teachers and school leaders who want reading instruction and intervention based on what makes the greatest impact.

INSIDE THE COURSE

Three modules, more than 14 hours of lectures

Video lectures with workbooks and resources for every module. Self-paced, with lifetime access on any device.

1 Fundamentals of High Impact Literacy Instruction and Intervention

RTI toolkit, high expectations, formative assessment, Visible Learning, daily review, explicit teaching and RTI.

2 Implementing the Science of Reading

Oral language, phonemic awareness and phonics, morphology, vocabulary, fluency, comprehension and the literacy block.

3 Writing Instruction with SRSD

Why SRSD and its essential components, plus a bonus lecture and resources on high-impact writing.

Also included

- PowerPoint templates for daily review, explicit vocabulary teaching and worked examples.
- Literacy block weekly planners and a data analysis discussion template.
- Science of Reading and RTI checklists, guides and student assessments.

"Julie's lectures are extremely engaging as she uses research that is also backed up with her experience and knowledge."

— Alison Felici, Assistant Principal, NSW

"I have come away more informed in the Science of Reading. My biggest take away is Response to Intervention and the importance of data."

— Sally Roberts, Education Assistant, WA

"All graduates should do this course."

— Katherine, Graduate Teacher

CREATED BY Julie Scali, Founder of Literacy Impact™ · 27 years across classrooms, school leadership and system level · Author, *High Impact Reading Instruction and Intervention in the Primary Years* · 2025 LDA Bruce Wicking Award

COURSE ONLY

$197 inc GST

Lifetime access to all three modules, workbooks, resources and the course community.

WITH COACHING

$497 inc GST

Everything in the course, plus 12 months of monthly 90-minute online group coaching.
